

Agentic Design Patterns

1. PROMPT CHAINING

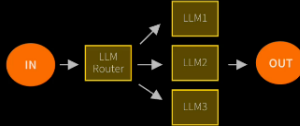

Decompose into fixed sub-tasks

1 PROMPT CHAINING

2. ROUTING

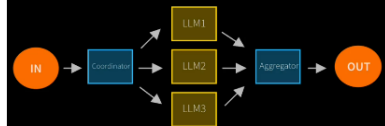

Direct an input into a specialized sub-task, ensuring separation of concerns

2 ROUTING

3. PARALLELIZATION

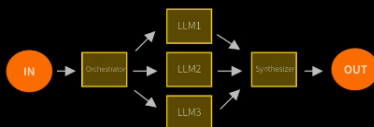

Breaking down tasks and running multiple subtasks concurrently

3 PARALLELIZATION

4. ORCHESTRATOR-WORKER

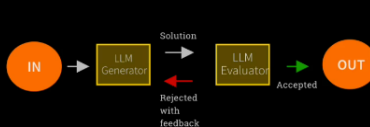

Complex tasks are broken down dynamically and combined

4 ORCHESTRATION WORKER

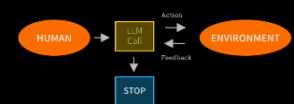

5. EVALUATOR-OPTIMIZER

LLM output is validated by another

5 EVALUATOR-OPTIMIZER

- 1. Open-ended
 - 2. Feedback loops
 - 3. No fixed path
- Agent Pattern

6 TRUE AGENT PATTERN
